

EMULATE™

Modified Vegetable Oil Concentrate

- Emulate is a blend of methylated soybean oil and surfactant emulsifier specifically designed for use with post emergence herbicides.
- Emulate is a low foam methylated seed oil that provides excellent leaf penetration which will provide greater herbicide activity than traditional oil adjuvants.
- Emulate should be applied at rates recommended on the herbicide label.
 - Typical use rates will be 1.5 - 2 pt/A or 1% v/v.
 - Package Sizes:
 - 2x2.5 gallon case
 - 110 gallon
 - Repack
 - Bulk

Always Read All Pesticide and Adjuvant Labels Prior to Use
